**"Experience the Best of Both Worlds: Sophisticated Leisure and Exhilarating Water sports at Vilamoura's Premier Marina Destination.**

**Developer Vilamoura World Group is building a new marina at Vilamoura on the Algarve coast.**

The group's owners — a team of investors linked to British fund Arrow Global — announced the installation of three pontoons with 68 berths, equipped with cutting-edge technology for top-notch facilities, comfort, and eco-friendliness. The development will allow for an additional 68 mooring berths, equipped with the latest technologies, capable of contributing to user comfort and environmental sustainability. Ranging from 20 to 40 metres, aiming to meet the booming demand in this niche and boost the area's appeal to affluent visitors.

Each berth will boast advanced features, like individual waste-water pump-out systems, electric boat charging points, and remote monitoring for water and electricity use.

Efforts are in progress to incorporate desalination and solar power for sustainable resource supply.

Isolete Correia, director of Vilamoura World, stated: “This new marina in Vilamoura elevates the destination and caters to the increasing market demand for large boats.”

She emphasized: “The marina also reflects our ongoing commitment to enhancing our service quality for our clients. They are the heart of this project, and we strive daily to offer them an unparalleled experience.”

Arrow Global, the owner of Vilamoura World, has declared a €500m investment in a “historic relaunch” of Vilamoura, aiming for a transformative uplift of the resort town.

Last year, Arrow Global announced its strategy to unify control over key Vilamoura properties to foster and synchronize their development, reaching new heights of excellence.

The construction of the new marina is already underway, with completion anticipated before the end of 2024.
